- Nose: Black craft foam
- Other: Hot glue gun, hot glue sticks, scissors, 1-inch circle punch (optional), cardboard to slide in the sock while gluing (optional).

Instructions: Delbert

Preparation from templates:

1. From long black fur, cut (1) DELBERT: FUR BEHIND EARS and (1) DELBERT: FUR BETWEEN EARS.
2. From stiff light gray felt, cut (2) DELBERT: OUTER EAR in opposite directions (ear tip pointing right for right ear and ear tip pointing left for left ear).
3. From dark gray felt, cut (2) DELBERT: INNER EAR.
4. From black felt, cut (1) DELBERT: MOUTH.
5. From black craft foam, cut (4) 1-inch circles with scissors using DELBERT: NOSTRILS & EYES or a 1-inch circle punch.

Assemble with hot glue (See photo for placement of pieces):

Note: While gluing, you will want to have a piece of cardboard or your hand inside the sock to keep from gluing the two sides of the sock together.

1. Attach (1) INNER EAR on top of each OUTER EAR. Remember: Make sure you have an outer ear pointing left and one pointing right.
2. Attach a sticky back eye to (2) of the 1-inch black foam circles.
Notes: We suggest gluing the stick back eyes to the foam as hot glue is stronger than the adhesive on the back of the eye. Make sure Delbert's eyelashes are on top before you glue them on. In the photos, you may see a white foam circle behind the black foam circle. This is optional and not included in these directions.
3. Attach the (2) eyes from step 2 and the other (2) 1-inch circles for nostrils to the top side of the tube sock.
4. Attach the bottom of the two ears to the tube sock, above the eyes. Leave space between the ears for fur.
5. Attach the FUR BEHIND EARS and the FUR BETWEEN EARS.
6. Attach the mouth to the bottom side of the tube sock.
